Top Tech Tidbits. The world's #1 online resource for current news and trends in access technology.

The publication's continued growth underscores its growing influence and commitment to empowering individuals with different abilities.

“

We are all proud to announce this milestone in our mission to provide high-quality, free and low-cost educational resources to persons seeking information about living with a specific disability.”

Aaron Di Blasi

“We are all incredibly proud to announce this significant milestone in our mission to provide ongoing, high-quality, free and low-cost educational resources to persons seeking current information about living with a specific disability,” said Aaron Di Blasi, Publisher for the Top Tech Tidbits Publication.

Top Tech Tidbits has been at the forefront of delivering the latest weekly news, tips, and resources in access technology since 2004.

The publication's focus on high-quality, human-curated content, relevant updates, and actionable insights has resonated with a global audience, leading to a steady increase in its subscriber base.

The publication's growth is not just a testament to the quality of its content, but also to the increasing importance of access technology in the daily lives of persons all over the world.

Top Tech Tidbits has been instrumental in bridging information gaps and providing a platform where professionals, educators, and enthusiasts can stay informed about the latest developments in the field.

"As we surpass 12,000 weekly subscribers we reaffirm our commitment to readers, sponsors, supporters and the access technology community at large that we will continue to provide high-quality, unbiased, human-curated access technology news and updates each

week, and continue to be a voice for innovation, accessibility and justice in the access technology space," said Jenna Lang, Editor for the Top Tech Tidbits publication.

In addition to weekly news and trends Top Tech Tidbits also offers exclusive insights, reader sentiment and expert opinions.

Its role in shaping the access technology landscape and influencing positive change in the access community is widely recognized by both industry and community leaders alike.

"On behalf of all of us here at Top Tech Tidbits, I would like to extend to all of you our sincerest thanks, and most heartfelt gratitude for your ongoing support. Whether you contribute to the newsletter, Sponsor it, Support it, or just read it every week, it is you that has made this milestone possible," added Aaron Di Blasi, Publisher.

As the Top Tech Tidbits newsletter moves forward it remains dedicated to its mission of empowerment through education, sharing and community building.

What is Access Technology?

Access Technology Broadly encompasses technologies that enable access to information and communication systems for a wide range of users, including those with disabilities. It's about

making existing systems like computers and the internet more accessible.

Adaptive Technology is a subset of Access Technology, specifically tailored or modified for people with disabilities. It's designed to assist individuals in performing tasks that might otherwise be challenging due to their particular disabilities.

Assistive Technology is a term often used interchangeably with Adaptive Technology but can have a broader scope. Assistive Technology includes any device, software, or equipment that helps people work around their challenges. While Adaptive Technology is primarily focused on modifications for disability-specific needs, Assistive Technology can also include tools and devices used by the elderly, those recovering from injuries, or individuals with temporary impairments. Examples include hearing aids, wheelchairs, and voice recognition software. The key aspect of Assistive Technology is its role in enhancing functional capabilities and improving quality of life for individuals facing a variety of challenges.
