The next wave of internet technology is known as metaverse. A vast network of shared, immersive, digital, or virtual worlds that link individuals and resemble the actual world is referred to as a "metaverse." It suggests that individuals may connect, and engage in activities like playing games, making friends, shopping, and other things exactly like what they would do in everyday life. The word "metaverse" is used to describe a three-dimensional cyberspace where players may interact while utilizing VR (virtual reality), augmented realities (AR), or mixed reality

(MR) gear. It might be viewed as a virtual network where members can play a variety of games utilizing modern digital technology. They can go even further and use artificial intelligence (AI) to play solitary games. In addition to this, the metaverse in gaming enables users to connect with

their friends to socialize and share the virtual experience. However, to fully enjoy the digital world, users must spend money on cutting-edge equipment like a fast internet connection and pricey VR or AR goggles. According to forecasts, the gaming metaverse market will expand quickly.
