Ready-mix concrete is a pre-made mixture of cement, aggregates, water and additives delivered to construction sites for immediate use in various building projects. The use of ready-mixed concrete ensures consistent quality and eliminates the need for on-site mixing, making it an efficient choice for construction projects of all sizes.

The main types of ready-mix concrete are transit mix concrete, central mix concrete and shrink mix concrete. Transit mix concrete is a type of concrete mixture that is pre-mixed in a central plant and transported to the construction site in specially designed trucks. The types of mixtures involved are volumetric and barrel truck or in-transit mixer. These can be delivered through on-site and off-site delivery models for several applications, including commercial, residential, infrastructure and industrial utilities.
