About the Verifiable Legal Entity Identifier (vLEI):

The vLEI represents an advanced digital version of the conventional Legal Entity Identifier (LEI). It introduces a uniform approach to authenticating digital identities and linking them to official organizational positions. The foundation of the vLEI system lies in the concepts of Self-Sovereign Identity (SSI) and Verifiable Credentials (VCs). These principles empower entities to manage and distribute their identity information in a secure, transparent manner. With vLEI it is possible to

tie physical persons to organizational identities enabling transparency and authenticity.

About vLEI.com:

As a hub of information, vLEI.com focuses on delivering comprehensive and accessible content regarding the vLEI system. Its mission is to enlighten and educate a worldwide audience on the significance of digital identity validation in fostering trust and transparency within the digital economic landscape.
