Family get-together holiday means tons of fun, festive family photos, selfies, and traveling vlogs, with Christmas songs playing alongside delicious feasts and puddings. iPhone can diligently record all these joyous memories, but it won't last forever. iPhones and iPads can quickly run out of space and they are vulnerable to data loss.

"DearMob is honored to safeguard every iPhone owner's

cherished memories, enhance iPhone management, and offer robust solutions for data backup, syncing, and break the limitations of iTunes, iCloud, and DRM," said Angie Tane, the Marketing Manager of DearMob. "To bring peace of mind to iPhone owners and celebrate the spirit of

giving, we kicked off this grand deal on DearMob iPhone Manager and software gift pack."

2. DearMob iPhone Manager as the Best Companion for iPhone

DearMob iPhone Manager was born to address iDevice management issues that perplex iPhone users. iTunes is less flexible, doesn't support exporting, imposes library restrictions, and threatens to erase the iPhone when connecting to another library. iCloud is good for daily syncing, but a double guarantee with offline backup is a must.

1) Free Up Storage Space to Get Prepared for Holiday Photo Snapping

Using DearMob iPhone Manager, iPhone, and iPad owners can export photos, videos, songs, and digital books to the computer. They serve as backup copies, and at the same time can free up device storage.

2) 1-Click iPhone Clone and Data Migration – Set Up iPhone 15 with Precious Content

For those purchasing new iPhones during the Christmas shopping spree, DearMob iPhone Manager is the best backup and restore software to switch iPhones.

It performs full device backup or selective backup at the choice of the user and can restore content to the new iPhone. Photos, videos, system settings, ringtones, contacts and all can be migrated to the new iPhone, ensuring a seamless iPhone switch.

3) Transfer Photos, Create Christmas Ringtones, and Import Songs with Holiday Vibes

DearMob iPhone Manager supports transferring and managing 15+ types of files: photos, videos, PDFs, contacts, songs, movies, books, office documents, file-sharing apps, and more. Unlike iTunes 1-way syncing, DearMob supports full-way transferring: from iPhone, and iPad to computers or vice versa.

The dedicated photo manager in DearMob supports transferring photos by album, by date, and by type, with a convenient feature to convert HEIC to JPG. ProRAW, DNG, photo bursts, panoramas, and more types are supported.

There are handy features to set Christmas ringtones or any sounds, merge duplicated contacts, convert incompatible video formats, and above all, take full control of precious iOS content and files.
