The Business Research Company

from \$54.4 billion in 2022 to \$61.72 billion in 2023, demonstrating a compound annual growth rate (CAGR) of 13.4%. The market is expected to maintain this momentum, reaching \$104.85 billion by 2027, with a robust CAGR of 14.2%.

Driving Forces:

The surge in heart diseases is a primary driver for the anticipated growth of the biomarkers market. The use of biomarkers, particularly natriuretic peptides and high sensitivity C-reactive protein, has witnessed a substantial

increase in diagnosing patients with heart failure. Heart disease, a leading cause of death globally, has experienced a notable uptick. For instance, in the United States, heart disease deaths increased by 4.8% in 2020, with nearly 6,908,820 people succumbing to heart-related issues. This alarming increase underscores the critical need for biomarkers in the diagnosis and management of heart diseases, contributing to the overall market growth.
