A hand towel refers to a rectangular piece of absorbent paper made from tissue paper instead of cloth. Paper towels soak up water because they are loosely woven, which enables water to travel between them even against gravity (capillary effect). Paper towels can be individually packed (as stacks of folded towels or held coiled) or come in rolls. Paper towels have similar purposes to conventional towels, such as drying hands, wiping the hands or face, wiping windows, dusting, and cleaning up spills.
