The Steinberg Law Group has decades of experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, the Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients. www.mesotheliomaoptions.com

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2023 were exposed decades ago. www.mesotheliomaoptions.com

Libby, Montana was home to notorious asbestos-contaminated vermiculite mines for most of the twentieth century. From the 1920s to 1990 when the Libby Mines were closed, contaminated asbestos was shipped from Montana throughout the country. As a result, Montana's annual
