

Dr. Çelik: Bariatric Surgery Reduces the Risk of Infertility and Cancer in Obese Women

General Surgery Specialist Op.Dr. Kafkas Çelik said that obesity causes many health problems in women.

ISTANBUL, ÜSKÜDAR, TÜRKİYE,
December 23, 2023 /

EINPresswire.com/ -- Explaining that scientific studies show that women who are extremely obese before pregnancy have a high risk of giving birth to a baby with neural tube defects, Op.Dr. Kafkas Çelik said: "Scientific studies have shown that the risk of having a baby with a neural tube defect is significantly increased in women who were extremely obese before pregnancy, compared to women of normal weight. On the other hand, it is known that [obesity](#) alone in women (Polycystic Ovary Syndrome) can lead to ovarian pathologies similar to PCOS."

Bariatric Surgery Reduces the Risk of Cancer in Women

Op. Dr. Çelik stated that obesity increases the risk of low pregnancy success, increased miscarriage rates and failure in assisted pregnancy treatments in women.

"According to research; Breast and endometrial cancers continue to be the most common types of cancer in obese
