Electric dryers are defined as equipment that is extensively employed by household consumers for carrying out the activity of drying clothes. The main function that is performed by the device is to soak up the moisture from the clothes, lessen the aroma level, and eliminate dust mites from the clothes.

The main types of dryers are spin dryers, condenser dryers, heat pump dryers, mechanical steam compression dryers, solar clothes dryers, and others. The various vent types include vented dryers, ventless/condenser dryers. A spin dryer is a low-energy dryer that uses centrifugal force to remove water from clothes. These dryers are typically much smaller than standard clothes dryers and do not use heat to dry clothes, instead, they rely on centrifugal force. The dryers are distributed through specialty stores, company-owned stores, hypermarkets, supermarkets, and online and other sales channels, and are used by commercial and residential end-users.
