Industrial Controls Global Market Report 2024 –
Market Size, Trends, And Global Forecast 2024-2033

The Business Research Company's "Industrial Controls Global Market Report 2024 is a comprehensive source of information that covers every facet of the market. As per TBRC's market forecast, the [industrial controls market size](#) is predicted to reach \$181.59 billion in 2028 at a compound annual growth rate (CAGR) of 4.2%.

The growth in the industrial controls market is due to the industrial controls market. Asia-Pacific region is expected to hold the largest industrial controls market share. Major players in the industrial controls market include Mitsubishi Electric Factory Automation, Siemens AG, Honeywell International Incorporation, Emerson Electric Company, Schneider Electric SA.

[Industrial Controls Market Segments](#)

- By Control system: Distributed Control System (DCS), Supervisory Control & Data Acquisition System (SCADA), Manufacturing Execution System (MES)
- By Component: Modular Terminal Block, Relays and Optocouplers, Surge Protectors, Marking Systems, Printing, Ferrules Cable Lugs, Handtools, Testers, Enclosure Products, PCB Connectors and Terminals, Heavy Duty Connectors, Analog Signal Conditioner, Electronics Housings, Power Supplies, Industrial Ethernet, Remote IO
- By End User: Automotive, Utility, Electronics & Semiconductor, Mining, Other End Users

- By Geography: The global industrial controls market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Industrial control refers to electronic control systems that can control, monitor, and automate industrial processes with high precision, improved product quality, and reliability.

The main types of control systems of industrial controls are distributed control systems (DCS), supervisory control and data acquisition system (SCADA,) and manufacturing execution system (MES). A distributed control system (DCS) is a platform for automated plant or industrial process control and operation. Human -machininterface (HMI), logic solvers, historian, common database, alarm management, and a common engineering suite are all combined into a DCS. The various component used includes modular terminal block relays and optocouplers, surge protectors, marking systems, printing, ferules cable lugs, handtools, testers, enclosure products, PCB connectors, and terminals, heavy-duty connectors, analog signal coconditionerselectronics housings, power supplies, industrial ethernet, and Remote IO. Industrial controls are used by automotive, utility, electronics and semiconductors, mining, and other end-users.
