The Business Research Company's Multimode-Fiber Cable Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

[The Business Research Company's](#) "Multimode-Fiber Cable Global Market Report 2024 is a comprehensive source of information that covers every facet of the market. As per TBRC's

“

The multimode-fiber cable market size is expected to see marginal growth in the next few years. It will grow to \$12.95 billion in 2028 at a compound annual growth rate (CAGR) of 0.1%.”

*The Business Research
Company*

market forecast, the multimode-fiber cable market size is predicted to reach \$12.95 billion in 2028 at a compound annual growth rate (CAGR) of 0.1%.

The growth in the multimode-fiber cable market is due to the growing adoption of IoT devices. Asia-Pacific region is expected to hold the largest multimode-fiber cable market share. Major players in the multimode-fiber cable market include Corning Incorporated, TE Connectivity Ltd., CommScope Inc., 3M Company, Fujikura Ltd., Amphenol Corporation, Molex LLC.

Multimode-Fiber Cable Market Segments

- By Product Type: Step Index Fiber, Gradient Type
- By Cable Type: Single-mode Cable, Multi-mode Cable
- By Material Type: Plastics Optical Fiber, Glass Optical Fiber
- By Application: IT & Telecom, Government, Energy, Automotive, Industries, Other Applications
- By Geography: The global multimode-fiber cable market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

The multimode fiber cable is an optical fiber cable, which is designed to carry multiple light rays simultaneously with a slightly different reflection angle. Multimode fiber cable can be used for short distances as the modes disperse over longer lengths. It is used in various industries such as telecom, broadcasting, military/aerospace, healthcare, and power.

The main product types of multimode fiber optic cable are step-index fiber and gradient type. Step-index fiber is a cylindrical waveguide core with an inner core that has a uniform refractive index of n_1 and an outer cladding that has a uniform refractive index of n_2 . The materials used are plastics optical fiber and glass optical fiber for the making of single-mode cable and multimode cable. The various applications include IT and telecom, government, energy, automotive, industries and others.
