A tank is an armored fighting vehicle that is equipped with heavy firepower and strong armor designed for front-line combat. Tanks include a balance of heavy firepower, strong armor, and improved battlefield mobility with a powerful engine.

The main types of tanks are light, medium, and heavy. The various technologies deployed in tanks include an active mine system, an active protection system, modular ballistic armor, situational awareness system, interoperable communication, vehicle information integration, and electric armor that are used for patrolling and fighting. Electric armor is a type of reactive armor that uses a strong electric current to protect ships and armored fighting vehicles from shaped charge and possibly kinetic weapons, supplementing or replacing conventional explosive-reacting armor.
