Site remediation consulting services refers to the systematic steps of detecting, investigating, and assessing the hazards of suspected contaminated sites, reversing harmful changes in the soil, eliminating site pollution, and implementing follow-up measures.

The main types of site remediation consulting services are bioremediation, pump & treat, in situ vitrification, thermal treatment, chemical treatment, excavation, soil washing, and others. Bioremediation is a field of biotechnology that uses living organisms such as microorganisms and bacteria to remove contaminants, pollutants, and poisons from soil, water, and other environments. The various forms of services include remediation services, soil remediation services, and water remediation services and are used by waste disposal sites, oil & gas, mining, chemicals & petrochemicals, manufacturing, agriculture, construction, and others.
