

Brighten Haiti and Rotary Clubs Collaborate on Solar Project at Historic 180 year old Lycée Philippe-Guerrier School

Rotary Clubs and Brighten Haiti empower Lycée Philippe-Guerrier with solar power, bringing modern electricity and computer labs for the first time.

SANTA ROSA, CA, USA, December 28, 2023 /EINPresswire.com/ -- In a landmark collaboration, Lycée Philippe-Guerrier, one of Haiti's most storied educational institutions, is set to receive a significant upgrade to its infrastructure. The Santa Rosa Sunrise [Rotary Club](#), West Seattle Rotary Club, and the Cap-Haitien Rotary Club have joined forces with [Brighten Haiti](#) to install a cutting-edge solar energy system at the school.

The Brighten Haiti Solar Training Center gets solar energy on its new training facility, to provide electricity and serve as a live training lab.

This solar project, executed by Brighten Haiti and its skilled Solar Apprentices, is a game-changer for the 180-year-old Lycée Philippe-Guerrier. It signifies the first time in its long history that the school will have stable electricity and computer labs, crucial for modern education.

“

Imagine a school that has not had electricity in 180 years, getting it for the first time ever. Providing lights, cooling classrooms and a computer lab.”

*Kevin Keene - Founder,
Brighten Haiti*

This initiative underscores the commitment of the involved Rotary clubs and Brighten Haiti to foster sustainable development and improve educational infrastructure in Haiti. The solar installation not only promises a brighter, more efficient learning environment for the students but also serves as a shining example of the positive impact of international cooperation and renewable energy in transforming communities.

Join us in celebrating this exceptional milestone, a testament to the power of collaboration and innovation in making a significant difference in the lives of young learners.
