Vitiligo Treatment Ayurveda

Vitiligo is a skin condition in which patches of skin lose their pigmentation, resulting in discoloured patches that can spread over the body. Conventional treatments for vitiligo include topical creams, light therapy, and skin grafting, which may have side effects and do not always provide long-lasting results.

“

Ayurveda has the potential to heal Vitiligo & Leucoderma from roots. Ayurhealthline has been serving since past 19 years for the same and has great success story of vitiligo healers.”

Dr.Ravish kamal

Ayurveda views vitiligo as a disorder caused by an imbalance of doshas (life energies) in the body, especially pitta dosha. Ayurvedic treatment aims to correct this imbalance through herbal medicines, diet changes, detoxification, and lifestyle changes. According to Dr. Ravish Kamal, Director of Vitiligo Specialty Clinic, "The holistic ayurvedic approach is very effective for vitiligo as it improves immunity, restores dosha balance and stimulates melanin production to re-pigment the skin naturally.

The clinic provides a customized three-pronged treatment based on the patient's dosha imbalance and condition. The first step is internal purification and detoxification through herbal medicines. The second step is administering immune balancing herbal medicines and remedies to strengthen the immune system. The third step is external

application of herbal creams and oils to stimulate melanin production and re-pigment the vitiligo skin. Dietary changes, yoga, meditation and exposure to early morning sunlight are also recommended to enhance the effects of treatment.

With its focus on natural herbal remedies, diet, and lifestyle changes, Ayurvedic treatment provides a safe and holistic solution for vitiligo. The clinic has successfully treated over 10000+ patients with vitiligo using

Ayurvedic remedies. "Ayurveda works to cure vitiligo by correcting the underlying dosha imbalance in a gentle, natural way without side effects. With proper treatment and patience, it is possible to re-pigment most patches and get clear, healthy skin.
