

## Aerospace Coatings Market Size, Share, Revenue, Trends And Drivers For 2024-2033

The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033

LANDON, GREATER LANDON, UK, January 3, 2024 /EINPresswire.com/ --The Business Research Company has updated all its market reports with the

Aerospace Coatings Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

latest information for the year 2024, projecting trends and forecasts until 2033

The Business Research Company's "<u>Aerospace Coatings Global Market Report 2024</u> is a comprehensive source of information that covers every facet of the market. As per TBRC's

## ٢٢

The aerospace coatings market size has grown strongly in recent years. It will grow from \$2.52 billion in 2023 to \$2.71 billion in 2024 at a compound annual growth rate (CAGR) of 7.5%." *The Business Research Company*  market forecast, the aerospace coatings market size is predicted to reach \$3.65 billion in 2028 at a compound annual growth rate (CAGR) of 7.7%.

The growth in the aerospace coatings market is due to the growing demand for commercial aircraft. North America region is expected to hold the largest aerospace coatings market share. Major players in the aerospace coatings market include Akzo Nobel N.V., Henkel AG & Co. KGaA, Mankiewicz Coatings GmbH & Co. KG, Hentzen Coatings Inc., Badische Anilin und Soda Fabrik.

## Aerospace Coatings Market Segments

- By Product Type: Top-Coat, Primer, Other Product Types
- By Resin: Epoxy, Polyurethane, Acrylic, Other Resins
- By Technology: Solvent-Based Coatings, Water-Based Coatings, Powder Coatings, Other Technologies
- By Application: Exterior, Interior
- By End User: Commercial Aviation, Military Aviation, General Aviation, Other End Users
- By Geography: The global aerospace coatings market is segmented into North America, South

America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Aerospace coatings provide a high level of resistance against high-temperature ranges, extreme UV exposure, air drag erosion, humidity corrosion, and the effect of high-velocity dust particles. It also helps to resist cracking due to variable air pressures. Aerospace coatings are applied to jets, planes, helicopters, and other aircraft to preserve their beauty and guard against corrosion.

The main types of aerospace coatings are top-coat, primer, and others. The top-coat is used as a seal, primary obstacles in the surroundings, protection from the climate, moisture, and chemicals, durability, and exterior resistance to abrasion. A top-coat is a transparent or translucent paint coat put over the underlying substrate. The topcoat in a paint system forms a resinous seal over the intermediate layers and primer. The different resins include epoxy, polyurethane, acrylic, and others that use various technologies such as solvent-based coatings, water-based coatings, powder coatings, and others. The several applications include exterior and interior that are employed by several users, such as commercial aviation, military aviation, general aviation, and others.
