Company*

The growth in the additive masterbatch market is due to rapid growth in the packaging industry. Asia-Pacific region is expected to hold the largest additive masterbatch market share. Major players in the additive masterbatch market include Clariant AG, Ampacet Corporation, Tosaf Compounds Ltd., Dow Corning Corp, Primex Color Compounding & Additives, Universal Masterbatch Llp.

[Additive Masterbatch Market Segments](#)

- By Type: Antimicrobial, Antioxidant, Flame-Retardant, Other Types
- By Carrier Resin: Polyethylene (PE), Polystyrene (PS), Polypropylene (PP), Polyvinyl Chloride (PVC), Polyethylene Terephthalate (PET), Other Carrier Resins
- By End User Industry: Packaging, Automotive, Consumer Goods, Building And Construction, Agriculture, Other End User Industries
- By Geography: The global additive masterbatch market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

The additive masterbatch refer to inorganic or organic compounds that come from both natural and artificial sources, used to change the original qualities or add new ones to pure plastic. Additive masterbatch can be used as the raw material for creating plastic items directly or in combination with other materials such as wood powder. When different additives are combined with plastic, different properties emerge, such as increased toughness, effective insulation, improved glossiness, and others.

The main types of additive masterbatch are antimicrobial, antioxidant, flame-retardant, and other types. The antimicrobial additive masterbatch is used as a masterbatch or combined with plastic resins as a compound to control bacteria. These antimicrobials shield the surface against bacterial deterioration and discoloration. These are also available by carrier resins such as polyethylene (PE), polystyrene (PS), polypropylene (PP), polyvinyl chloride (PVC), polyethylene terephthalate (PET), and other carrier resins. They are used in packaging, automotive, consumer goods, building and construction, agriculture, and other sectors.
