Aerospace tapes refer to tapes used to create optimal surfaces to protect the aircraft composite molding. The aerospace tape is used for bonding, insulation, and sealing of aircraft's sensitive equipment and aircraft structures. These increase the lifespan of an aircraft's infrastructure and equipment and reduce the maintenance cost by protecting against vibrations, corrosion, and fluids.

The main resin types of aerospace tapes are acrylic, rubber, silicone, and other resin types. Acrylic refers to a kind of plastic, fabric, fiber, or paint that's made from acrylic acid. The various backing materials include paper or tissue, film, foam, and other backing material. The various end-users include commercial aviation, military aviation, and general aviation.
