OKW's New SMART-PANEL Wall-Mount Enclosures For Electronic Control Centers

OKW's new S114 SMART-PANEL wall-mount enclosures are designed for building monitoring and control. They fit flush-mount cavity wall boxes up to 3.94” x 3.94”.

OKW has added new size S114 to its SMART-PANEL range of electronic control center enclosures

BRIDGEVILLE, PENNSYLVANIA, USA, January 3, 2024 /EINPresswire.com/ -- Elegant SMART-PANEL is ideal for applications including building services systems, electrical installations, smart homes, offices, security, IoT/IIoT, wireless communications, measuring and control, medical and laboratory technology.

The enclosures have a highly polished bottom section with a flat, recessed area for interfaces such as USB or mini-USB. The top has a fine surface structure and is recessed to accommodate a touch screen or membrane keypad.

> “Our SMART-PANEL is perfect for today's wall mounted electronic control systems.”

Electronic components such as PCBs can be fitted in the top section of the enclosure using the four mounting pillars provided. Self-tapping PCB screws are available as accessories.

Screwless snap-together assembly speeds up installation times. The enclosures can then be reopened for inspection and maintenance using a pair of dedicated tools available as an accessory.

At launch, SMART-PANEL was originally designed to fit standard flush-mount cavity wall boxes with a 2.40” opening. New size S114 (4.49” x 4.49” x 0.84”) fits larger international boxes up to 3.94” x 3.94”.

It complements the existing S84 (3.31” x 3.31” x 0.84”) and E155 (6.10” x 3.31” x 0.84”) sizes. All the enclosures are molded from UV-stable ASA+PC (UL 94 V-0) in traffic white (RAL 9016) as standard.

OKW can supply SMART-PANEL fully customized. Services include CNC machining, printing of legends, logos and photo-quality graphics, laser marking, decor foils, RFI/EMI shielding, and assembly of accessories.
