TBRC's market forecast, the antimicrobial medical device coatings market size is predicted to reach \$4.78 billion in 2028 at a compound annual growth rate (CAGR) of 15.5%.

The growth in the antimicrobial medical device coatings market is due to the rising cardiovascular diseases. North America region is expected to hold the largest antimicrobial medical device coatings market share. Major players in the antimicrobial medical device coatings market include AST Products Inc., BioInteractions Ltd., Covalon

Technologies Ltd., Koninklijke DSM N.V., Hydromer Inc., BASF SE, Sciosent LLC.

[Antimicrobial Medical Device Coatings Market Segments](#)

- By Type of Material: Metallic Coatings, Non Metallic Coatings
- By Device Type: Catheters, Implantable Devices, Surgical Instruments, Other Device Types
- By Application: Orthopedics, General Surgery, Dentistry, Cardiovascular, Gynecology, Other Applications

- By End User: Hospitals, Diagnostic Centers, Ambulatory Surgical Centers
- By Geography: The global antimicrobial medical device coatings market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Chemicals are used in antimicrobial coatings to prevent pathogen growth by disrupting cellular membranes. In other words, an antimicrobial coating is a chemical substance that is applied to a surface to prevent disease-causing microorganisms from growing. These coatings not only improve the surface's durability, appearance, corrosion resistance, and so on, but they also protect it against disease-causing bacteria.

The main types of antimicrobial medical device coatings are metallic coatings and non-metallic coatings. Metallic coatings contain a metallic element or alloy and are applied on devices or equipment for protection against corrosion, sunlight, and oxidation. Metallic coatings consist of silver coatings, copper coatings, and other metallic coatings. Non-metallic coatings can be added to metallic coatings to produce effective wear-resistant coatings. The different types of devices include catheters, implantable devices, surgical instruments, and others. It is implemented in areas such as orthopedics, general surgery, dentistry, cardiovascular, gynecology, and others and is used in hospitals, diagnostic centers, and ambulatory surgical centers.

The Table Of Content For The Market Report Include:

1. Executive Summary
2. Antimicrobial Medical Device Coatings Market Characteristics
3. Antimicrobial Medical Device Coatings Market Trends And Strategies
4. Antimicrobial Medical Device Coatings Market – Macro Economic Scenario
5. Antimicrobial Medical Device Coatings Market Size And Growth
-
27. Antimicrobial Medical Device Coatings Market Competitor Landscape And Company Profiles
28. Key Mergers And Acquisitions In The Market
29. Antimicrobial Medical Device Coatings Market Future Outlook and Potential Analysis
30. Appendix
