

Planet TV Studios Unveils the Future of Healthcare with Blue Line Sterilization Services in New Documentary Series

*Airing Soon on Bloomberg TV: Unveiling Innovation in Healthcare & Sterilization
Produced by Planet TV Studios, Leaders in Groundbreaking Television Production*

NOVATO, CALIFORNIA, UNITED STATES, January 3, 2024 /EINPresswire.com/ -- Planet TV Studios, a leading producer of cutting-edge television series, announces their latest healthcare documentary series titled "New Frontiers," featuring [Blue Line Sterilization Services](#), a prominent California-based [medical device sterilization](#) company.

"New Frontiers" is a thought-provoking series designed to explore innovative healthcare organizations that are at the forefront of shaping the future of health management in the nation. The documentary episodes will be airing early January 2024 on national television, Bloomberg TV, and available on-demand through various platforms, including Amazon, Google Play, Roku, and more.

Planet TV Studios is delighted to have Gina Grad back as their host. Gina is an accomplished author, podcast host, and radio personality based in Los Angeles, California. She previously served as the co-host and news anchor of the Adam Carolla Show, a podcast that held the Guinness World Record for the most downloaded episodes. Gina has also anchored on KFI 640 AM and hosted mornings on 100.3 FM. In addition to her broadcasting career, she is the author of ["My Extra Mom"](#), a children's book designed to assist kids and stepparents in navigating the challenges of blended families.

Founded in 2009, Blue Line Sterilization Services has been dedicated to reducing the time to market for innovators designing new medical devices. The company distinguishes itself by maintaining a bank of 8 cubic foot ethylene oxide (EO) sterilizers, providing FDA and EU

compliant sterilization with turnaround times ranging from 1 to 3 days—an achievement not possible with larger EO sterilization services.

Co-founders Brant and Jane Gard recognized the critical need for accelerated sterilization options, particularly for dynamic development programs creating innovative medical devices. The ability to swiftly navigate through device iterations is paramount in reducing the need for additional funding, preserving the value of investors' equity, and expediting time to market. Faster service and reduced time to market hold significant value for employees, investors, and the patients benefiting from improved medical care.

In addition to routine sterilization, Blue Line offers rapid turnkey validations and small batch releases that support clinical trials and FDA/CE submissions. Collaborating with Blue Line enables developers of new medical devices to significantly shorten their schedules, promptly assess new design iterations, and expedite product launches.

Blue Line Sterilization Services remains committed to upholding the highest standards of quality while consistently providing reliable, rapid, and responsive ethylene oxide sterilization and consulting services tailored to meet the unique needs of their clients.

About Planet TV Studios:
