Barrier resins refer to plastics that are used in packaging to prevent the penetration of gases, vapors (water or solvent), or liquids. Barrier resins are plastics used in packaging to prevent the passage of gases (oxygen, carbon dioxide, and nitrogen), vapor (water or solvent), or liquid.

The main barrier resin packaging types include flexible packaging and rigid packaging. Flexible packaging is mostly made from plastic, film, foil, and paper and is hence light, compact, and flexible. The different resin types include polyvinylidene chloride, ethylene vinyl alcohol, polyethylene naphthalate, polyamide, polyethylene terephthalate, polyethylene, polypropylene, polyvinyl alcohol, and other resin types used in applications such as food and beverage, pharmaceutical and medical, cosmetics, agriculture, industrial, and other applications.
