The battlefield management system (BMS) provides an integrated common operating picture (COP) of the battlefield, utilizing collaborative planning tools to enable tactical commanders at all levels, from battalion HQ to section commanders, to make responsive and knowledge-based decisions and exercise highly effective control over operations in a dynamic and fluid battlefield, all while remaining focused on their primary missions. Commanders of any arm or service at various hierarchical levels can benefit from the real-time precise information provided by the battlefield management system, allowing them to make the correct decisions at the right moment. Understanding the battlefield in its current state is critical for any mission's success and survival.
