Automotive HUD refers to a technology designed to present information directly in the driver's field of view ahead on the windshield and improve the visual comfort of the driver. It is used to display crucial information and data without diverting the driver from their usual viewing position.

The main types of automotive HUD are windshield and combiner. Windshield HUD refers to a special type of laminated windshield generally mounted on the car dashboard with an additional polarized layer to reflect the images projected on it through a special projector. The major technologies used are conventional and augmented reality HUDs. The various dimensions are 2D and 3D. The various types of fuel include BEV, ICE, and hybrid. These are used by passenger cars, small cars, compact cars, mid-sized cars, luxury cars, SUVs and crossovers, and light commercial vehicles.
