

Magic Mushrooms and Depression: Up Next on 'What's Bugging Me'

*MAGIC MUSHROOMS AND DEPRESSION:
UP NEXT ON "WHAT'S BUGGING ME"*

*An Old Hippie Hallucinogen Holds Hope
for Chronically Depressed Patients*

NEW YORK, NY, UNITED STATES,
January 5, 2024 /EINPresswire.com/ --
On the new episode of "What's
Bugging Me," the CEO of Cybin Inc.
discusses the results of a small trial
that treated chronically depressed
patients with synthesized psilocybin
based on the chief ingredient in "magic
mushrooms."

Doug Drysdale joins host Dennis
Kneale on Episode #59 of the podcast
to tell of how 80% of the 48 patients in
Cybin's latest trial found full remission
of their depression symptoms after
just one or two doses. This benefit has
lasted for weeks afterward, so far.

Cybin creates a synthetic version of the
psilocybin found in hallucinogenic
mushrooms to better control dosing,
Drysdale says.

A flurry of legally approved FDA trials
are underway for new treatments
based on the street drugs that millions
of hippies took for pleasure in the
1960s, 1970s, and beyond, the CEO
explains.

What's Bugging Me on the Ricochet Network, new
episode up every Thursday.

Claudine Gay resigns the presidency of Hah-vahd and the left melts down. Well, tough. We're determined to make 2024 a "Year of Accountability" and this is a great start.

Harvard President Resigns

These include psilocybin mushrooms, LSD, ayahuasca (whose active chemical is akin to the street drug DMT), ketamine, and ecstasy or Molly (MDMA).

The company's stock trades under the symbol CYBN in the range of 40 cents a share on the NYSE American exchange for small-cap stocks. One of its largest holders is Point72 Ventures, owned by Steven A. Cohen, owner of the New York Mets.

The new episode #59 of "What's Bugging Me" is here on Ricochet:
