The butane gas cartridges market consists of sales of butane gas cartridges by entities (organizations, sole traders, and partnerships) that contain liquified butane gas mixed with a much smaller amount of Propane. These are manufactured using metal for better storage function and are most commonly used for camping and picnics, sealing poly bags, metalworking, pest control, and fumigation.

The main types of butane gas cartridges are below 220g/unit, 220-250g/unit, and above 250g/unit. Below 220g/unit cartridges are mainly used for portable gas stoves, fogging machines, and butane lanterns, and others. The different applications include medical, stoves, food and beverages, commercial, others and used in various verticals such as pharmaceutical and biotechnological companies, chemical and petrochemical companies, food and beverage companies, others.
