[The Business Research Company's](#) “Cardiovascular And Soft Tissue Repair Patches Global Market Report 2024 is a comprehensive source of information that covers every facet of the market. As

“

The cardiovascular and soft tissue repair patches market size is expected growth to \$6.75 billion in 2028 at a compound annual growth rate (CAGR) of 10.6%.”

The Business Research Company

per TBRC’s market forecast, the cardiovascular and soft tissue repair patches market size is predicted to reach \$6.75 billion in 2028 at a compound annual growth rate (CAGR) of 10.6%.

The growth in the cardiovascular and soft tissue repair patches market is due to the growing demand for patches in cardiac disease. North America region is expected to hold the largest cardiovascular and soft tissue repair patches market share. Major players in the cardiovascular and soft tissue repair patches market include B Braun,

Baxter International Inc., CorMatrix Cardiovascular Inc., Cryolife Inc., Edwards Lifesciences Corporation, LeMaitre Vascular Inc.

Cardiovascular And Soft Tissue Repair Patches Market Segments

•By Raw Materials: ePTFE, Biomaterial And Tissue-Engineered Material, Other Raw Materials

- By Product: Synthetic Patch, Biologic Patch
- By Application: Cardiac Repair, Atrial Septal Defect, Common Atrium, Defects Of The Endocardial Cushion, Ventricular Septal Defect, Tetralogy Of Fallot, Right Ventricular Outflow Tract Reconstruction, Suture Bleeding, Vascular Repair And Reconstruction, Transposition Of The Great Vessels
- By End User: Hospitals, Ambulatory Surgical Centers, Specialty Clinics
- By Geography: The global cardiovascular and soft tissue repair patches market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Cardiovascular and soft tissue repair patches refer to artificial tissue generated in the laboratory used for the restoration of damaged body tissue made up of tissues grown in the laboratory and polymers. These are used for the replacement of damaged body parts to maintain the functioning of a body organ, provide mechanical regeneration support for damaged myocardium layers, and restore functional characteristics of injured tissue for the treatment of cardiovascular diseases.

The main raw materials of cardiovascular and soft tissue repair patches are ePTFE, biomaterial and tissue-engineered material, and other raw materials. The ePTFE material is used in the manufacturing of medical devices such as catheters, biocompatible services, and cardiac sutures. The ePTFE is an expanded Polytetrafluoroethylene material made up of tetrafluoroethylene polymer units composed of Teflon. The products are synthetic patches and biological patches. The applications are cardiac repair, atrial septal defect, common atrium, defects of the endocardial cushion, ventricular septal defect, tetralogy of Fallot, right ventricular outflow tract reconstruction, suture bleeding, vascular repair and reconstruction, transposition of the great vessels. The end users include hospitals, ambulatory surgical centers, and specialty clinics.
