The citric acid refers to the weak organic acid that occurs in natural products such as citrus fruits limes, oranges, and lemons. It is produced commercially by the fermentation procedure, and it seems white, odorless, and crystalline powder at room temperature. Citric acid, due to its sour tasting and acidic nature, is commonly used as a preservative and flavoring agent. It also has various benefits to even skin tone and kills bacteria and viruses.

The main types of citric acid are liquid and anhydrous. Liquid Citric Acid is a food-grade, weak organic acid that has a wide range of applications in the food business. The key functions are acidulant, preservative, antioxidant, and sequestrant having applications in various industries such as food and beverage, bakery, confectionery, dairy, pharmaceutical, personal care, and other applications.
