The glycol ethers are used as solvents and stabilizers in a variety of personal, household, and industrial products. Glycol ethers are a large group of solvents that are colorless liquids with a higher boiling point, a slight odor, and a lower molecular weight compared to other solvents. The ether groups would introduce additional sites for hydrogen bonding with improved hydrophilic solubility performance.

The main types of glycol ethers are e-series and p-series. P-series glycol ethers are commonly utilized in degreasers, cleaners, aerosol paints, and adhesives. These are applicable insolvent, anti-icing, hydraulic and brake fluid, and chemical intermediates, and are used in paints and coatings, printing, pharmaceuticals, cosmetics and personal care, adhesives, and other end-users.
