Generator sales refer to sales and services of generators, a machine with an internal combustion engine, and electricity generators that can supply uninterrupted power to the generator installations in the requirements of end users. The generator converts mechanical energy into electric power for use in an external circuit.

The main type of generator sales is diesel, gas, and other types. A diesel generator generates electricity by combining a diesel engine and an electric generator. A diesel generator can be used as an emergency power supply in the event of a power outage or in areas where there is no power grid connection. The sales channel included in generator sales are direct, indirect, and have application such as standby, prime & continuous, and peak shaving. These are used by industrial, commercial, and residential sectors.
