Industrial flooring refers to a process that provides the foundation for floor surfaces by permanently covering the floor using various materials. Industrial flooring is used to provide durability and resistance to abrasion, heavy traffic, and heavy loads to the surface. Industrial flooring offers a variety of designs, textures, and colors to the floor.

The main types of industrial flooring are light-duty, medium-duty, and heavy-duty. Light-duty flooring is used in all manufacturing units and clean room areas where manpower and trolley movement are generally involved. The different flooring materials include concrete, wood, mortar, and other flooring materials. These are used in food and beverage manufacturing, healthcare, industrial manufacturing, automotive manufacturing, and other applications.
