Industrial gloves refer to the gloves for the protection of workers working in a factory. They are used to protect the hands while using heavy machinery, tools, and devices, as well as strong

chemicals for mild heat resistance, high abrasion resistance, and non-slip coating for better grip, comfort, durability, and protection from cuts, burns, chemicals, and other hazards.

The main products of industrial gloves are reusable gloves and disposable gloves. Reusable gloves refer to gloves that offer greater protection and are less likely to tear in use than disposables. The types of materials used include natural rubber gloves, nitrile gloves, vinyl gloves, neoprene gloves, polyethylene gloves, and other materials used by pharmaceuticals, automotive and transportation, food, oil and gas, mining, chemicals, and other end-users.
