Healthcare adhesive tape refers to pressure-sensitive tape that sticks and stays in place with firm pressure. They can be made from various materials, but most are breathable for comfort and ease of use. The healthcare adhesive tapes are used to offer the holding of a bandage or other dressing onto a wound.

The main types of resins for healthcare adhesive tapes are acrylic, rubber, silicone, and other resin types. Acrylic healthcare adhesive tape is a resin-based, two-part adhesive, comprised of acrylic or methyl acrylic polymers. The various types of backing materials include paper, fabric, plastic, and other backing material types applied in surgery, wound dressing, splints, secure IV line, ostomy seal, hygiene, bandages, transdermal patches, blister protection, diagnostic, monitoring, medical devices, optical care, and others application.
