Industrial starch is used in food and non-food products. Starch is a polymeric carbohydrate that contains glucose units joined by glycosidic bonds. Industrial starch is extracted from various natural sources such as rice, wheat, potato, maize, and tapioca.

The main types of products in industrial starch are cationic starch, ethylated starch, oxidized starch, acid-modified starch, and unmodified starch. Cationic industrial starch refers to the slurry of partially swollen granules of starch that are produced by treating with a reactive compound. The various sources include corn, wheat, cassava, potato, others that are used in food, feed, paper industry, pharmaceutical industry, and other applications.
