

Streamlined Laboratory Integration With INTEGRA's Electronic and Automated Liquid Handling Solutions

ST NEOTS, CAMBRIDGESHIRE, UNITED KINGDOM, January 11, 2024

/EINPresswire.com/ -- Rapid technological advancements in the life sciences field have made automation a key focus for many laboratories, and [INTEGRA Biosciences](#) is proud to provide advanced liquid handling solutions to streamline laboratory protocols. The company offers a wide range of electronic pipettes, automated pipettes and reagent dispensers that can be seamlessly integrated into a digital or walk-away workflow, improving both productivity and reliability in the lab.

INTEGRA

INTEGRA liquid handling products can be seamlessly integrated into a connected lab solution

INTEGRA's innovative products – including [VIAFLO electronic pipettes](#) and [VOYAGER adjustable tip spacing pipettes](#), as well as the ASSIST PLUS pipetting robot (<https://www.integra-biosciences.com/global/en/pipetting-robots/assist-plus>) and WELLJET reagent dispenser (<https://www.integra-biosciences.com/global/en/microplate-dispenser/welljet>) – provide more than just compact, precise and cost-effective liquid handling solutions. At the core of the instruments' capabilities lies a comprehensive application programming interface (API) command set, which enables bi-directional communication via a Bluetooth® or wired connection. This connectivity allows scientists to integrate the individual technologies into a wider, automated workflow, giving them the opportunity to digitally tailor liquid handling programs to their specific requirements, and define and execute commands remotely.

Seamlessly integrating INTEGRA products into a connected lab solution opens doors to more efficient liquid handling workflows, saving valuable time and resources, enhancing data traceability, and allowing scientists to stay at the forefront of innovation.

Learn more about how lab integration can be achieved with INTEGRA instruments (https://www.integra-biosciences.com/global/en/stories/unlocking-potential-integra-instruments-laboratory-integration?utm_campaign=lab-integration&utm_medium=referral&utm_content=press-release).

About INTEGRA Biosciences

INTEGRA Biosciences (<https://www.integra-biosciences.com>) is a leading provider of high-quality laboratory tools and consumables for liquid handling and media preparation. The company is committed to creating innovative solutions which fulfil the needs of its customers in research, diagnostics and quality control within the life sciences markets and medical sector. Today, INTEGRA innovative laboratory products are widely used all around the world. More than 100 distribution partners form a worldwide sales network providing responsive and competent services to customers. These distribution partners are supported by a highly motivated and experienced team of specialists at the company headquarters in Zizers, Switzerland and Hudson, NH, USA. INTEGRA is an ISO 9001 certified company.
