READY Robotics Achieves ISO 27001 Certification: A Milestone in Information Security Management

The industry pioneer brings enhanced data security to industrial automation with their ISO-certified information security management system

COLUMBUS, OHIO, UNITED STATES, January 11, 2024 /EINPresswire.com/ -- READY Robotics, a leader in industrial automation solutions, proudly announces its ISO 27001 (ISO/IEC 27001:2022) certification, demonstrating its unwavering commitment to information security management.

READY Robotics

ISO 27001 is a globally recognized standard that outlines the best practices for an Information Security Management System (ISMS). This certification signifies that READY Robotics has implemented a systematic and rigorous approach to managing sensitive company and customer information.

"

We are committed to continuously improving our data security protocols to meet the highest standards, further demonstrating our position as a trustworthy partner in industrial automation solutions."

James Sugrue

"The ISO 27001 certification is a testament to our dedication to securing our operations and protecting our customer data," said Doug Elder, President of READY Robotics. "With a user base that spans industries such as aerospace, defense, tier 1 automotive, and other regulated industries, it's imperative that we handle customer data with integrity and rigor. Maintaining the highest level of information security is not just an obligation, but a necessity."

Achieving this certification involved a detailed assessment of the company's information security practices, including risk management processes, staff training, physical and technical safeguards,

and legal compliance. The successful certification reflects READY Robotics' systematic approach to managing and protecting company and client data.

"With the ever-increasing threat to data security, this certification assures our customers that their information is in safe hands," said James Sugrue, READY Robotics' VP of Customer Success and Communication. "We are committed to continuously improving our data security protocols to meet the highest standards, further demonstrating our position as a trustworthy partner in industrial automation solutions."

READY Robotics' achievement of ISO 27001 certification is not only a significant milestone for the company and underscores READY Robotics' ongoing commitment to excellence and its dedication to providing secure, reliable solutions to its clients.

About READY Robotics

Founded in 2016, READY Robotics is the developer of ForgeOS, the industrial OS for robots and automation, and a pioneer in cutting-edge automation solutions that overcome the obstacles faced by manufacturers. Our commitment to putting people first drives our mission to empower everyone with intuitive interfaces for controlling robots and automating tasks, as well as providing educational resources to help transition workers into the world of automation. At READY, we don't make robots. We make robots better.
