[Courier, Express, and Parcel \(CEP\) Market Overview](#)

The Courier, Express, and Parcel (CEP) market is projected to grow from USD 482.31 Billion in 2023 to USD 733.88 Billion by 2030; it is expected to grow at a CAGR of 6.18% from 2024 to 2030.

“

Rapidly increasing demand for Courier, Express, and Parcel (CEP) services, driven by e-commerce growth and global supply chain dynamics.”

Exactitude Consultancy

Services for courier, express, and parcel delivery (CEP) transport packages and papers to a wide range of clients, including businesses, government organizations, and retail establishments. It entails the transportation of diverse commodities and products across geographical boundaries via a variety of media, including land, sea, and air. When delivering non-palletized parcels, the service provider sets a fee that varies according on the weight and urgency of the shipment. Due to their cost-effectiveness, secure delivery alternatives, and package tracking services,

courier, express, and parcel (CEP) service providers are currently becoming more and more popular worldwide.

The growth of the courier, express, and parcel markets is bolstered by factors including the

expansion of trade agreements, the growth of the e-commerce sector, and the growing demand for expedited package delivery. However, obstacles that are anticipated to impede the expansion of the courier, express, and package industry include inadequate infrastructure, increased logistics costs, and a lack of manufacturer control over logistics services. Additionally, last-mile deliveries and technology developments in delivery services, together with logistics automation, open up new markets for the major players in the industry.
