

DUNMORE Launches a New Sustainable PET Printable Film

Dunmore introduces a new sustainable printable PET film, DUN-GREEN™, an environmentally friendly option for label and graphics applications.

BRISTOL, PA, UNITED STATES, January 16, 2024 /EINPresswire.com/ --

Dunmore announces the launch of a [DUN-GREEN™, a new sustainable, printable polyester \(PET\) film](#). DUN-GREEN™ PET film is sustainable and eco-friendly, with a printable topcoat containing 75% post-consumer recycled (PCR) content. The PET film base has 80% recycled content, offering customers a printable, sustainable, and responsible choice for their label, graphic and packaging requirements.

Robin Kobrin, Senior Research Chemist

and the driving force behind DUN-GREEN™, shared, "Dunmore has seen an increase in interest regarding sustainable solutions for labels, graphics, and packaging applications. We believe that a printable topcoat with >75% PCR content will offer a unique, full construction solution that is environmentally friendly and can be printed on multiple printing technologies. DUN-GREEN™ has printed successfully with solvent, water based and UV-curable flexographic inks. It is a great addition to our expanding portfolio."

More information and technical details about this new product innovation, [DUN-GREEN™ sustainable, eco-friendly printable PET film](#) can be found on the Dunmore website, along with Dunmore's other [printable films for graphics applications](#).
