

ReElement Technologies Engages Law Firm Alexander & Partner for Formation of ReElement Ghana

ReElement Technologies Ghana LLC will initially be wholly owned by ReElement Technologies Africa Ltd, a wholly owned by of ReElement Technologies Corporation

FISHERS, INDIANA, UNITED STATES, January 16, 2024 /EINPresswire.com/ -- [American Resources](#) Corporation's (NASDAQ:AREC) ("American Resources" or the "Company") wholly owned subsidiary, [ReElement](#) Technologies LLC ("ReElement"), a leading provider of high performance refining capacity of

rare earth and critical battery elements, today announced it has engaged law firm [Alexander & Partner](#) Rechtsanwälte mbB for the formation of ReElement Technologies Ghana LLC ("ReElement Ghana") under Ghanaian law along with future work in other key markets under development by ReElement Technologies.

“

Our firm is perfectly positioned to cover the relevant geographical markets for ReElement's critical and rare earth mineral business in Africa for mining relationships and refining locations...”

Oliver Alexander, Founding Partner, Alexander & Partner

about working with Alexnader & Partner as we progress our expansion in Nigeria, Senegal and Germany.”

Oliver Alexander, Founding Partner of Alexander & Partner stated, "We are very excited to work with ReElement during their meaningful expansion into international markets. Our firm is perfectly positioned to cover the relevant geographical markets for ReElement's critical and rare earth mineral business in Africa for mining relationships and refining locations, Europe for offtake partnerships and the Middle East for financing. They are shifting the narrative on doing business in the rare earth and critical mineral space by eliminating the bottleneck of refining such elements in country, not only reducing the carbon footprint but also creating an alignment of interests with the local

nations in which they partner with to create jobs and economic expansion. We have enjoyed our work so far with their team and look forward to the many exciting years we have ahead."

Alexander & Partner's initial work is focused on the formation of the ReElement Ghana subsidiary and advising the Company on local regulations and local laws. The parties are also in the initial phase of development in Germany, Senegal and Nigeria as ReElement continues its expansion of local training and full scale critical mineral refining facilities. The development work will focus on subsidiary establishment, local law and regulation advisement as well as setting up local incentive packages for its local workforce and local teams.

ReElement Technologies is committed to leading the domestic supply chain for rare earth and battery elements in the electrified economy. The Company has proven that its patented chromatographic separation and purification is a low cost, scalable, flexible and environmentally safe replacement to the existing environmentally and socially toxic alternatives used around the globe for rare earth and critical element separation and purification. As the Company executes and scales the production at its facilities, it will significantly reduce the United States' dependency on foreign nations for the supply of these critical raw materials while also creating a true circular life-cycle solution.
