

Beyond the Wire: NS ARC Introduces On-Site Assessment Team to Save Weld Customers Time and Money

NS ARC launches its ARC Assessment Program and Pit Crew services to provide on-site evaluations and expert support to improve customers' welding productivity.

STILLWATER, OKLAHOMA, UNITED STATES OF AMERICA, January 23, 2024 /EINPresswire.com/ -- NS ARC, the

largest dedicated woman-owned welding wire manufacturer, has announced it is relaunching its [ARC Assessment Program](#) services. Once a staple of the level of service National Standard delivered, NS ARC is bringing this service back as part of its newly launched, dedicated welding wire division.

“

With our complete on-site analysis, we will offer decades of expertise to clients looking for a new perspective on their welding requirements—with tools and optimization beyond the wire," Wehner said."

Tom Wehner

"Decades ago, National Standard deployed their 'Pit Crew' into various applications to improve a customer's productivity and processes," said Tom Wehner, NS ARC's VP of Sales & Marketing. "Many of those clients are still using National Standard products today. With our welding division being highlighted with the branding of NS ARC, we are pleased to re-introduce this program."

The Arc Assessment Program will utilize the expertise of their aptly named "Pit Crew" team, a knowledgeable group

of welding experts and technicians who have decades of industry experience that help customers with diagnosing issues while providing industry guidance, advice and technical support. This skilled team is committed to providing unparalleled support and resources to clients by developing strategies and recommendations that enhance operational efficiency and optimize welding capabilities for their growing portfolio of clients.

Designed for personalized assistance and guidance, the [NS ARC Pit Crew](#) team provides evaluations, customized reports and expert recommendations using multi-faceted criteria. This program offers a comprehensive on-site inspection of current welding practices and includes a

NS ARC is reintroducing the National Standard ARC Assessment Program and Pit Crew services.

personalized analysis of how a business' operations work today, and what improvements can be made using best practices and recommendations. This thorough, on-site evaluation includes an analysis of each stage of production, from raw materials to finished goods.

The program is designed to save customers money and resources by identifying and solving any challenges that may be present at various stages in the manufacturing process to improve the overall productivity of a business.

"The NS ARC Pit Crew Program will offer complete on-site analysis of current weld state, factors, best practices and paths for optimization beyond the wire," Wehner continued. "Simply put, we will offer decades of expertise to clients looking for an alternative perspective to their welding requirements."

As the welding industry continues to evolve, businesses need to remain agile and well-prepared to meet the challenges and seize whatever opportunities they can. The NS ARC Pit Crew stands ready to guide companies through this dynamic landscape while providing expert information and the resources these companies need to succeed. With the Pit Crew's dedication and expertise, welding businesses can confidently embrace the future and stay at the forefront of the industry by thriving in the changing markets. Please visit the [ARC Assessment page](#) to learn more about this exciting program.
