Insulated shipping packaging refers to a type of packaging that controls the temperature of a product and aids in shipping various items that are temperature-sensitive. Insulated packaging protects products from temperature and pressure fluctuations, as well as physical harm. The insulated shipping packaging is used for the preservation of product freshness and efficacy.

The main types of insulated shipping packaging are pouches and bags, boxes and containers, and other types. Pouches and bags refer to small or medium-sized bags for storing or transferring stuff that is compact, lightweight thermal envelopes and are ideal for transporting flat or small temperature-sensitive items. The various materials include plastic, wood, glass, and other material that are used in food and beverages, industrial, pharmaceuticals, beauty and personal care, and other end-user applications.
