Lactose is a sugar present in milk and is found in all kinds of dairy products made from milk such as ice cream and yogurt. It consists of disaccharides of glucose and galactose units and is found in milk amounts ranging from 2–8%. Lactose is used in a large number of foodstuffs and in the pharmaceutical industry.

The different forms of lactose are powder and granule. Lactose powder is used as a sweetener or stabilizer in the food and pharmaceutical sectors. The powder lactose is dry in form and usually white or pale yellow with a slightly sweet taste and smell of milk. The different purity types include crude lactose, edible lactose, and refined-edible grade lactose and are in yellow, pale-yellow to white, white color. Lactose is used in various sectors such as food and beverages, confectionery, animal feed, pharmaceutical, cosmetics, others.
