Law enforcement personal protective equipment refers to equipment worn to reduce exposure to risks that result in serious workplace illnesses and injuries and that will shield the user from the risk of mishaps or negative health effects. Law enforcement personal protective equipment is used in the construction, chemical, healthcare, and automotive industries.

The main types of law enforcement personal protective equipment include protective clothing, respiratory protection, eye and face protection, head protection, and hand protection. Protective clothing is specifically designed, treated, or fabricated to protect law enforcement personnel from hazards that are caused by extreme environmental conditions, or a dangerous work environment. The protective clothing extends to body armor such as bulletproof vests, historical armor, and futuristic powered armor. Some of the respiratory protection equipment is reusable respirators, powered and supplied air respirator, and disposable respirators. Various technologies used for law enforcement personal protective equipment include IT, Artificial Intelligence, Big Data, C21, C21SR, C21STAR, C3, C31, C4, and C412, intelligence systems, personal equipment, detection devices, surveillance, and others. The major applications of law enforcement personal protective equipment can be seen in the healthcare industry, the fire services industry, and government agencies.
