Pet wearables refer to devices worn on the pet's body, such as dogs, cats, and other pets, to serve various purposes, such as identification, tracking, monitoring, controlling, medical diagnosis, treatment, facilitation, safety, and security. These devices help get the data, which is tracked through a companion app installed on the pet owner's smart device. The pet wearable is used to track information related to pets, such as fitness, activity, sleeping time, behavior, and steps.
