Oxalic Acid Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

The Business Research Company's "Oxalic Acid Global Market Report 2024 is a comprehensive source of information that covers every facet of the market. As per TBRC's market forecast, the [oxalic acid market size](#) is predicted to reach \$1.5 billion in 2028 at a compound annual growth rate (CAGR) of 4.4%.

“

It will grow to \$1.5 billion in 2028 at a compound annual growth rate (CAGR) of 4.4%”

*The Business Research
Company*

The growth in the oxalic acid market is due to the rising concerns regarding the increase in surgical site infections. Asia-Pacific region is expected to hold the largest [oxalic acid market share](#). Major players in the oxalic acid market include Honeywell International Inc., Merck KGaA, Clariant

AG, UBE Corporation, Sigma-Aldrich Co. LLC, PCC Rokita SA, Shandong Fengyuan Chemical Co.

[Oxalic Acid Market Segments](#)

1. By Product Grade: Anhydrous, Dihydrate, Aqueous Solution
2. By Process: Oxidation Of Carbohydrates, CO Coupling Reaction, Oxidation Of Propylene, Sodium Formate Process
3. By Application: Bleaching And Purifying Agents, Reducing Agents, Stain And Rust Removers, Miticide, Precipitation Agents, Other Applications
4. By End Use: Petrochemicals, Water Treatment Chemicals, Metallurgy, Textiles And Leather, Pharmaceuticals, Electronics And Semiconductors, Wood Pulp, Bee-Hiving
5. By Geography: The global oxalic acid market is segmented into North America, South America,

Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Oxalic acid is a chemical compound with the formula $C_2H_2O_4$ and is used as a cleaning agent and rust remover. Its acidic properties make it effective in dissolving and removing mineral deposits, stains, and rust from various surfaces.

The main product grades of oxalic acid are anhydrous, dihydrate, and aqueous solution. Anhydrous oxalic acid is the pure, crystalline form of oxalic acid without any water molecules, which is used in specific applications where water content needs to be minimized or controlled. It is prepared by the oxidation of carbohydrates, co-coupling reaction, oxidation of propylene, and sodium formate process. These are used in bleaching and purifying agents, reducing agents, stain and rust removers, miticides, precipitation agents, and others. These are used by petrochemicals, water treatment chemicals, metallurgy, textiles and leather, pharmaceuticals, electronics and semiconductors, wood pulp, and bee-hiving end-users.
