

# Echo Industries Announces Purchase of HAAS-VF2 Vertical Milling Machine

*Deep draw metal stamping company looks to expand with added machining capabilities*

ORANGE, MASSACHUSETTS, USA, January 18, 2024 /EINPresswire.com/ -- [Echo Industries](#), a [deep draw metal stamping company](#) specializing in brass, stainless steel, cold rolled steel among other metals, announced that they have recently purchased a HAAS VF-2 vertical milling machine.

Of the recent operational expansion, Echo CEO Scott Lechlitter said, "The seasoned team at Echo felt this was the next step in our evolution. The HAAS VF-2 will allow us to complete secondary operations that were previously outsourced, which will increase our throughput and decrease our lead times, making Echo more competitive. In addition, we have recently hired a senior machinist / programmer that will allow us to expand into machined components, offering existing and new customers quality parts that meet stringent specifications. We look forward to leveraging our 100+ years of business in the metal business in this new arena for Echo."

“

The HAAS VF-2 will allow us to complete secondary operations that were previously outsourced, which will increase our throughput and decrease our lead times, making Echo more competitive. ”

*Scott Lechlitter*

Haas VF2 Vertical Milling Machine

Haas Automation is the largest machine tool builder in the United States, and one of the largest builders of CNC machines in the world
