“

The global industrial hemp market is expected to witness significant growth owing to technological innovation with regards to the cultivation and machinery to develop hemp plants more efficiently.”

Allied Market Research

Hemp seeds or industrial hemp is obtained from “Cannabis sativa” which contains only traces of tetrahydrocannabinol (THC). Hemp seeds are especially grown for commercial use and it is used in wide range of products. Hemp seeds are rich in two essential fatty acids, linolenic (omega-3) and linoleic (omega-6). They are also rich source of vitamin B1, vitamin B2, vitamin B6, vitamin D, vitamin E, magnesium, calcium and potassium among others. Moreover, very rare plant-based foods are a complete source of protein, hemp seeds on the other hand

possess descent amount of protein that can be considered as a value addition to a vegan diet. Since, the humans cannot generate essential fatty acids, the addition of hemp seeds in food

application will be useful as they are a rich source of linoleic (omega-6) and linolenic (omega-3). Furthermore, hemp seeds can be used to produce a variety of food products such as hemp milk, hemp oil, hemp cheese substitutes and hemp-based protein powder. Thus, owing to rich source of protein and vitamin hemp seed are used in food and beverages which further fuels the growth of industrial hemp market.

Key players in the industrial hemp market are:

Hempco Food and Fiber Inc.

Ecofibre

Hemp Inc.

GenCanna

HempFlax Group B.V.

The Konoplex Group

South Hemp

Plains Industrial Hemp Processing Ltd.

MH medical hemp

Hempro International GmbH & Co. KG

The raising legalization of the cultivation of hemp is encouraging the producer and research institution to develop new products from industrial hemp. In addition, legalization and increased production of hemp oil may improve the cost of producing hemp oil and subsequently hemp biodiesel. Biofuels is one such application, which is anticipated to have crucial growth potential in the upcoming years. Continuous rise in the price of oil (petrol & diesel), along with the raising concerns about global warming, biofuels have been gaining popularity. Moreover, hemp seed extracts are used to produce hemp biodiesel, which can be used any diesel operated vehicle. Furthermore, industrial hemp can be used to produce ethanol, which is currently processed from food crops like corn and wheat. This process will result in increased efficiency of food production. Thus, raising new product development from hemp is becoming the current industrial hemp market trends.

COVID-19 was declared a pandemic by the World Health Organization (WHO) on March 11, 2020. The COVID-19 pandemic has had a significant impact on the industrial hemp market, due to import and export restrictions on hems and its related products. In addition, lockdown measures imposed by governments are key challenges exporters face in North America and Asian markets, as they disrupt global supply chain.
