

# Capacitor Bank Market Revenue US\$ 6 Billion | Europe 3.6% CAGR by United Kingdom, Germany, France, Italy, Denmark

*Capacitor Bank Market Share is projected to grow at a CAGR of 4.3% To 2031*

WILMINGTON, DELAWARE, UNITED STATES, January 21, 2024  
/EINPresswire.com/ --

According to a new report published by Allied Market Research, The global [capacitor bank market](#) was valued at \$3.9 billion in 2021, and is projected to reach \$6.0 billion by 2031, growing at a CAGR of 4.3% from 2022 to 2031.

Capacitor banks play a crucial role in maintaining the reliability and efficiency of electrical power systems, contributing to improved power quality and the overall stability of the grid. Their application is diverse, ranging from large utility-scale installations to smaller systems in industrial and commercial settings.

The global Capacitor bank market is expected to gain significant growth owing to robust growth of the electric power industry.”

North America is expected to grow at the fastest rate, registering a CAGR of 4.7%, throughout the forecast period.

In 2021, Asia-Pacific dominated the global capacitor bank market, with more than 31.0% of the share in terms of revenue.

Major Companies

Eaton, Comar Condensatori S.p.A, ABB Ltd., Enerlux Power s.r.l., Hitachi Ltd. (Hitachi), Circutor, Siemens, Toshiba Corporation (Toshiba), Vishay Intertechnology, Inc., EPCOS, and others.

Other players that operate in the value chain of the global capacitor bank market include Yuhchang, Treffer Power System Solution Private Limited, R J Enterprises, Laxmi Electronics, ABPS Solution Private Limited, Clantech Solutions and Services Private Limited, Amp Volt Control, and other tier-2 players.

A capacitor bank is a grouping of individual capacitors interconnected in series or parallel and designed to provide specific electrical characteristics for various applications within power systems. Capacitor banks are used to improve power factor, enhance system efficiency, and stabilize voltage levels.

The global Capacitor bank market size is expected to gain high growth in the coming years as capacitor bank are used for power saving, storage of energy, and other associated purposes.

Enquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/32268>

Other specifications such as power output and load are also required to manufacture a customized capacitor bank depending on the needed rating. Its major uses include storage of electrical energy in and regulate the energy flow, across the system.

In addition, increasing investments rise in investment by major key players such as ABB Ltd and COMAR Condensatori S.p.A is expected to create potential growth opportunities for key players operating in this market.

Rise in demand for capacitor banks for power factor correction, rapid growth of industrialization, and rise in investment by major key players are the key factors that significantly contribute toward the growth of the global capacitor bank market.

Industrial sector is also the fastest-growing application segment in the global capacitor bank market, expected to grow at a CAGR of 4.9% during 2022–2031.

In 2021, the medium voltage segment accounted for about 47% of the share in the global capacitor bank market, and is expected to maintain its dominance till the end of the forecast period.

Get a Customized Research Report: <https://www.alliedmarketresearch.com/request-for-customization/32268>

In 2021, the industrial segment accounted for 26.9% of the capacitor bank market share in the year 2021, and is anticipated to grow at a rate of 4.9% in terms of revenue, increasing its share in the global capacitor bank market.

These capacitor banks have proved to be very useful in industrial sectors, which, in turn, gives traction to the capacitor bank market growth globally. There are two major advantages associated with capacitor banks, including improved quality of the electrical supply and increased effectiveness of power systems.

Another factor fueling the global market demand is increasing use of capacitor banks in the electric power industry as power saver widely utilized in the electric motors and transmission lines.

Other applications include steel, cement, petrochemical refineries, pulp & paper industry. These industries use capacitor banks to reduce cost of electricity bills and improve the efficiency of electric energy.

COVID-19 analysis

The Capacitor bank market was negatively impacted due to the COVID-19 pandemic. However, Europe is the prominent market which was impacted the most in 2020, with a loss of 7% year on year. This slowed down the growth of global market in 2020. But, at the end of third quarter of 2022, the global market is estimated to be fully recover, and is projected to grow with a CAGR of 4.3% by the end of 2031.

## About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
