

Home Rehabilitation Products Market has grown exponentially on Account of demand ; CAGR of 7.1%

Home rehabilitation products assist people with impairments by enhancing, preserving, and recovering their physical strength and mobility

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, UNITED STATE, January 19, 2024 /EINPresswire.com/ -- These home rehabilitation products emerged at the forefront during the outbreak of the COVID-19 pandemic, primarily to limit the risk of exposure to the virus for patients and clinicians. Increase in the geriatric population and the growth in the prevalence of chronic diseases propel the growth of the global [home rehabilitation products market](#).

Home Rehabilitation Products Market - AMR

Home Rehabilitation Products Market Overview 2031

According to a new report published by Allied Market Research, titled, "Home Rehabilitation Products Market," The Home Rehabilitation Products Market Size was at \$22.4 billion in 2021, and is estimated to reach \$43.6 billion by 2031, growing at a CAGR of 7.1% from 2022 to 2031. Home Rehabilitation Products Market Analysis are divided wheelchairs, general aids, body support devices, and positioning devices. All these different types of home rehabilitation products help people suffering from disabilities by improving, maintaining, and restoring physical strength and motion.

Home rehabilitation products assist people with impairments by enhancing, preserving, and recovering their physical strength and mobility. Increase in elderly population and chronic illness incidences propel the global market for home rehabilitation products. VR-based home rehabilitation can induce successful treatment protocol adherence as effectively as a human-supervised procedure due to real-time multisensory capabilities. Through enhanced stimulation, multisensory, auditory, and visual feedback can motivate consumers to exercise more. In

addition, IVR-based physical rehabilitation permits enhanced quantitative input from both the user and the therapist. VR can also be utilized as a valuable exercise treatment tool for a variety of conditions requiring rehabilitation; it can be a solution to the difficulties associated with traditional exercise therapy approaches.

Home Rehabilitation Products Market Opportunity is anticipated to grow :-

During the Home Rehabilitation Products Market Forecast period, presence of virtual reality in the home rehabilitation product industry is expected to grow as a result of government assistance in the form of incentives. In addition to expanding healthcare infrastructure and varied rehabilitation support programs, the Home Rehabilitation Products Market Opportunity is anticipated to grow.

The home rehabilitation products market is segmented on the basis of type, patient type, end user, and region. On the basis of type, the market is classified into wheelchairs, general aids, body support devices, positioning devices, and others. The wheelchairs, segment occupied a major Home Rehabilitation Products Market Share in 2021, and is projected to maintain its dominance during the forecast period. This Home Rehabilitation Products Market Growth is attributed to rise in number of spinal cord injuries, which need mobility assistance. However, the others segment is anticipated to grow in the future.

Increase in geriatric population is one of the primary factors that fuels the manual wheelchair market growth. The number of people above the age of 60 have experienced threefold growth in recent years, which is expected to increase during the forecast period as well. Elderly people are more prone to chronic diseases such as cardiac diseases, hypertension, and mobility impairment. Moreover, they are also susceptible to arthritis that limits mobility. As a result, demand for wheelchairs from geriatric population is expected to increase extensively in the coming years, thus driving the home rehabilitation products market.
